- Colors
- Logo

GLASS

Chemically strengthened glass
Thermally tempered glass

Impact Resistant up to 30 joules

DRILLING HOLES OR SLOTS

Standard Hole Diameter min 1 mm
Irregular Hole Diameter min 1.5 mm

SURFACE TREATMENTS

Anti-Reflection

reducing the reflection on the surface of the display by applying a coating of a specific thickness to the surface of a cover lens.

Anti-Glare

removing a bright glare from the display surface by creating a rough surface on the cover lens.

Anti-Finger

preventing fingerprints and smudges on the display surface by applying a type of treatment that reduces the cover lens' ability to retain oils.

Mirror

Derived as a functional reflective coating to help redirect light from the surface of lenses.
