

# General Touch Industrial Panel PCs

## PANEL MOUNT PC

The GT Panel Industrial Panel PCs is the epitome of quality and performance for the fast-paced world of industrial automation. Now the Panel Mount PCs series are available in 10.1", 15" and 15.6" screen sizes.

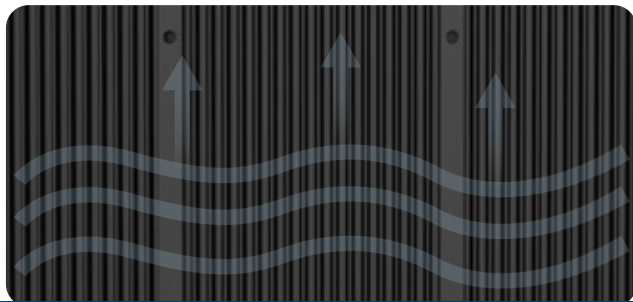

**Intel Celeron J6412 Processors**  
Reliable performance with low power consumption

**IP65 Rated Front Bezel**  
Protection against dust and water ingress

**Fanless Design with Aluminum Metal backplate heat sink**  
Excellent heat dissipation for longlasting operation

**Projected Capacitive (PCAP) Touch Technology**  
Accurate and responsive touch capability

### Ruggedized for Industrial Environments

These industrial-grade panel mount PCs are engineered to withstand the rigors of harsh operating conditions typical in industrial settings. The fanless and sealed design prevents dust and moisture ingress, while the aluminum Metal backplate heat sink promotes effective heat dissipation.

### Energy Efficient and Eco-Friendly

Powered by Intel's Celeron J6412 processors, these PCs deliver reliable computing performance while minimizing power consumption and environmental impact.

### Easy Mounting and Installation

The panel mount models enable easy and seamless integration into machine panels, control rooms or any flat surface.

# General Touch Industrial Panel PCs

## CLOSED FRAME PC

The GT Panel Industrial Panel PCs is the epitome of quality and performance for the fast-paced world of industrial automation. Now the Closed Frame PCs series are available in 15.6" and 21.5" screen sizes.

**Powerful Intel 11th Gen Intel Core i5 Processors**  
Blazing performance for demanding industrial applications

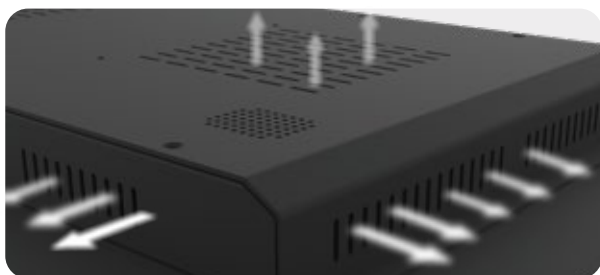

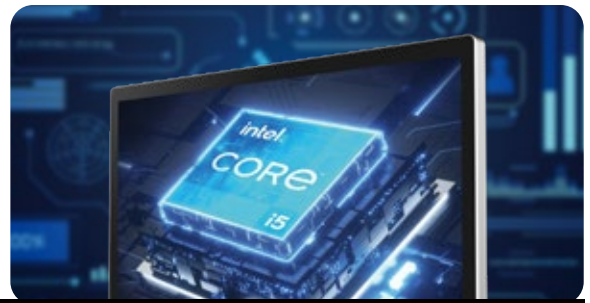

**Rugged Metal Chassis with Smart Cooling**  
Sturdy and robust construction

**Flexible VESA Mounting**  
VESA mount for secure installation on walls, machines, or workstations

**Projected Capacitive (PCAP) Touch Technology**  
Accurate and responsive touch capability

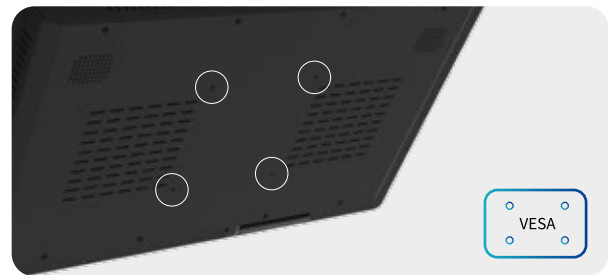

### Touch Computing at Its Height

Unleash industrial-grade computing power with best-in-class touch capability. This rugged Intel Core i5 panel PC is tailored to drive your most demanding factory automation, HMI and data acquisition applications.

### Ruggedized Inside and Out

This industrial panel PC packs best-in-class computing power into a solid, rust-proof metal housing that will breeze through punishing conditions. The smart cooling system ensures reliable operation even in sweltering temperatures and designed for 24/7 operation in harsh environments.

### Install It Your Way

With the VESA mounting, this panel PC can be securely installed in virtually any orientation - horizontally, vertically or angled - on a wall, machine body or swing arm.
